

Wipro Lighting Forays into Infrastructure Projects

Wipro Lighting , Leaders in Indoor Lighting have taken an important step forward to work and contribute in the growth of the country.

India today is the fastest growing economy in the world. This has lead to large investments and spending by the government in developing the infrastructure of the country.

An important initiative taken in this direction has been the development of the Mass Rapid Transport System in the capital of the country New Delhi.

The Delhi Metro has set new standards in Urban Development and Transport facilities in the country. The facilities being provided are the best in the world.The Phase one of this project has now been completed and is operational.

Wipro Lighting has been at the forefront of this project in terms of being associated as one of the preferred vendors.

Wipro Lighting has contributed by Lighting up more than 30 stations and depots in Phase I.

The Line 3 project spanning from Dwarka to Rajeev Chowk is unique and the first of its kind as it is for the first time in India that a Public Transport Area Facility has been lit up by Intelligent Lighting solutions. The entire Line 3 project uses dimmable lighting systems and controls to deliver the following benefits:

- Power Savings
- Convenience
- Comfort
- Safety

Execution of this landmark project has ensured that Wipro Lighting will increase its contribution on projects of similar stature and profile in the country.
