

Wipro Lighting's Internet of Lighting

AT A RECENTLY ORGANIZED Light Show in Mumbai, Wipro Lighting unveiled its Internet of Lighting (IoL) solutions for smart and connected indoor and outdoor lighting. The brand collaborated with leading global technology companies like Cisco for Power over Ethernet (PoE) based lighting

solutions, and is also offering Human Centric Lighting solutions for new age workspaces. These collaborations enhance user experience and deliver the desired outcome — be it energy saving, or improving workspace productivity, and enhanced employee well-being. Wipro has also tied up with

pureLi-Fi, Scotland to deliver high speed and secure data transmission through LED luminaires. The indoor lighting solutions include the international Red Dot award winning VergeLED, newly launched OpusLED, downlighters and sensors. www.wiprolighting.com
