

XlineLEDPro

Trunk mounted LED channel

Part 1 – Features & Customer
Benefits

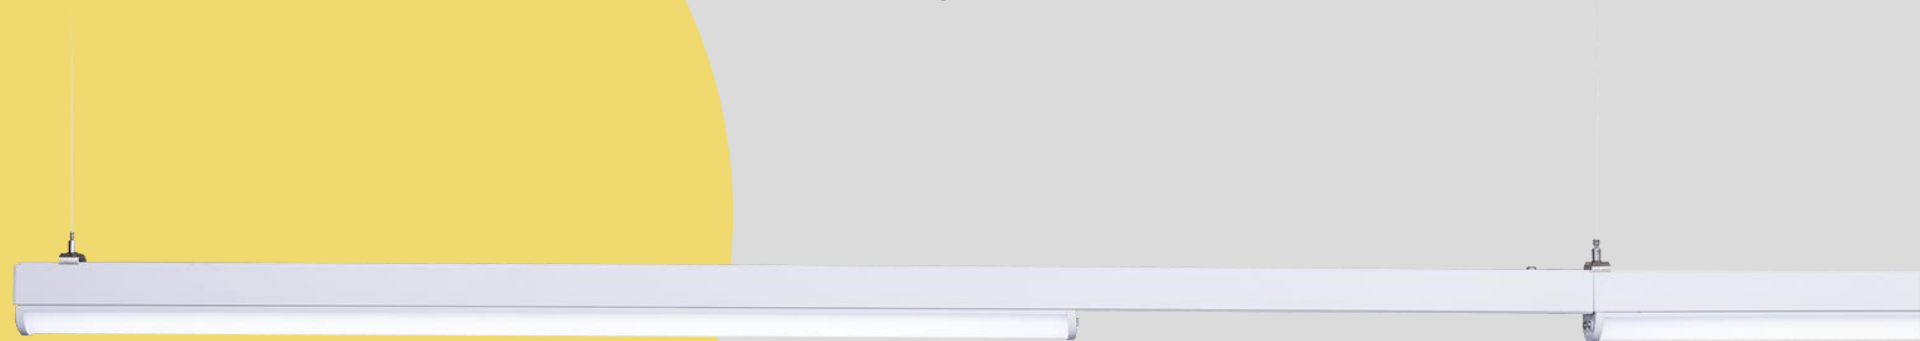

Linear lighting solution for high & consistent performance

Linear lighting solution for high & consistent performance

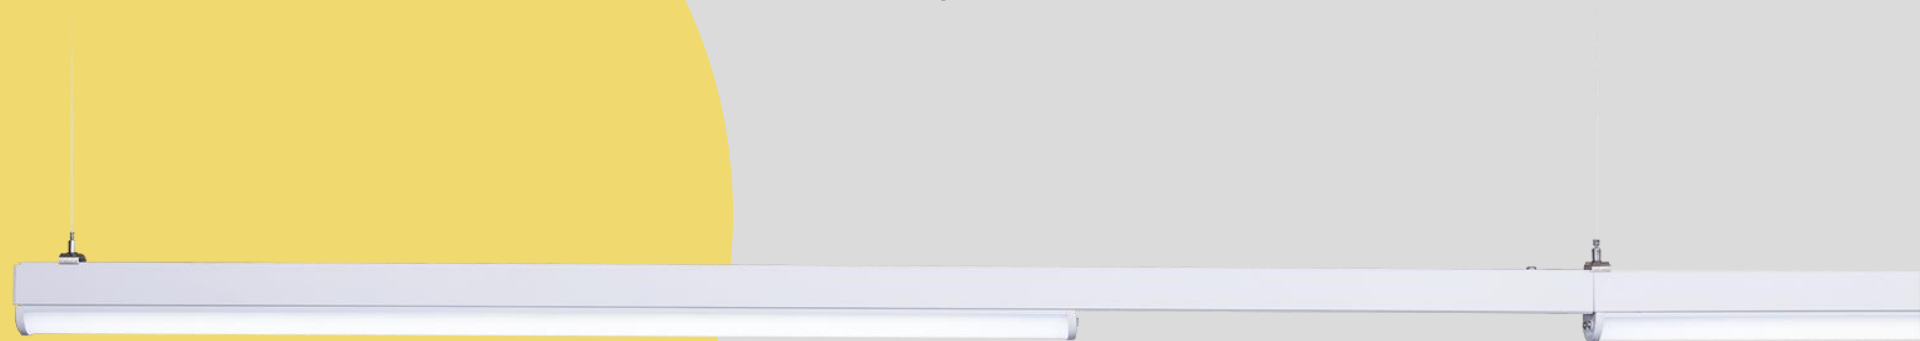

Modularity and end to end connectivity

- ❑ Thoughtfully designed and well-engineered product comprising of a trunk and a luminaire.
- ❑ Versatile solution for areas that demand linear light installation.

Modularity and end to end connectivity

- ❑ Innovative design makes it user friendly and quick to install continuous rows of light.
- ❑ Modularity and Easy adaptability makes lighting in industries and metro stations more dynamic and productive.

Fixed modules in various standard trunks lengths, provides an end to end connectivity that gives an uninterrupted illumination

Trunks can be interconnected with precise alignment and easily scaled to create continuous rows of light

Its simple configuration gives options of having continuous rows of lights or having only a stand-alone installation

Uniform illumination

Polycarbonate high transmittivity diffuser provides clean uniform illumination, creating a productive ambience

IP54 for long service life

Specially designed extruded, non-corrosive Aluminum housing leads to excellent heat dissipation and sturdy performance

IP54 provides a long service life

Energy Savings

High efficacy LEDs deliver significant energy savings

Reduced Operational Cost

Saves wiring and Installation cost
